

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + Keep it legal Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

PREFACE.

In introducing this Dictionary to the public the author feels no small degree of diffidence. Nothing but the great need of such a work, felt by all foreigners in Japan, and the constant demand upon those who were making the study of the language their special business to share their acquisitions with others, could have induced him to issue it at this stage of his acquaintance with the language. The conviction that it is a first step in the right direction, and that, with all its deficiencies, it will prove of some use, could alone have made him consent to its publication.

In compiling this work the author has labored under the very great difficulty of having had little to assist him from the works of predecessors in the same field. The only works of the kind within his reach were the small vocabulary of Dr. Medhurst published in Batavia in 1830; and the Japanese and Portuguese Dictionary published by the Jesuit missionaries in 1603. His principal dependence, however, has been upon the living teacher, so that he feels himself alone responsible for every thing in the work.

There are over 20,000 Japanese words defined in the dictionary. This number might have been considerably increased, if all the compound words of which the language is capable, and all the obsolete words had been inserted. Those here published have been collected, for the most part, in the course of his own reading, or heard in use among the people. A large number of the words are of Chinese origin, and used mainly in books and epistolary writings, and have a very limited range of meaning. The most common words, whether native or Chinese, he has endeavored to illustrate, as much as possible, with examples; some of them extracted from books, but generally with colloquial phrases.

He might have made it a less pretentious volume, confining himself to only such words as are in common use; but his desire has been to present the whole language to the eye of the scholar arranged in proper order; and though he may not have exhausted the meaning of the words, he has endeavored to make as near an approximation to it as possible.

To render the work more complete he has added the Japanese Kana, and Chinese characters. The spelling with the Kana is according to the best native authority. The Chinese characters attached to the native words are those commonly used as their equivalents.

It has also been attempted to designate the part of speech to which each word belongs. This with the native words is not a matter of much difficulty, but with the Chinese is impossible in most cases, as the same word may be viewed as a noun, verb, or adjective, according to it various relations.

PREFACE.

The introduction of the synonymous words will also be found useful. This branch has been more fully carried out in the second part, or Index.

In Romanizing the words, the effort has been in every case to express the sound as pronounced by the most cultivated natives; and the system of orthography, with a few variations, is that generally adopted by the students of the language in Japan.

The printing has been accomplished under many difficulties, especially from the want of accented vowels and a proper supply of capital letters which could not be procured in Shanghai, and had to be manufactured under many disadvantages. This will account for the want of uniformity and irregularity observable.

Notwithstanding every care, not a few typographical errors are observed; but as most of them are unimportant and a little attention will enable the reader to rectify them for himself, it is not thought necessary to publish a list of errata.

With these apologies and explanations, the author commits this work, the fruit of nearly eight years of unremitting labor, to the kind indulgence of those who are making the language their study, and if he can in this way, lend them a helping hand out of some of the difficulties which he had so often to encounter alone, he will feel that his labor has not been in vain.

THE ORTHOGRAPHY.

a	has the	sound	of a	in	father.
e	;,	"	e	in	they, prey.
i	"	"	i	in	machine.
0	,,	,,	0	in	no, so.
น	,,	,,	u	in	rule, moon.

The horizontal mark over the vowels; as, ā, ī, ō, ū, indicates merely that the sound is prolonged.

ai	has	the sound			aisle, or eye.
au		79	010	in	cow, how.
ch		"	ch	in	church.
sh		"	sh	in	shall, ship.

, when followed by a syllable commencing with y, has the sound of ai, or i in thine; as, hayaku, is pronounced, haiyaku; ayamachi, aiyamachi.

f, has a close resemblance to the sound of the English, f; but differs from it in that the teeth do not touch the lip, but the sound is made by blowing fu, softly through the lips when nearly closed, something like the wh sound in who, or why.

g, in the Yedo dialect has the soft sound of ng; but in Nagasaki, Kiyoto, and the southern departments it is pronounced hard; as in go, gain.

r, in ra, re, ro, ru, has the sound of the English, r; but in ri, it is pronounced more like d. But this is not invariable as many natives give it the common r sound.

The vowel sound in sz, tsz, and dz, is the same. It has no equivalent in English, but as near as possible to the sound expressed by the letters. Se in Kiyoto, Nagasaki and the southern departments is pronounced, she; and ze, like je.

The final $n(\nu)$, when at the end of a word has always the sound of ng; as, mon = mong, san = sang, shin = shing; but in the body of a word, when followed by a syllable beginning with b, m, or p, it is pronounced like m; as. ban-min = bamming, mon-ban = mombang, shin-pai = shimpai. Before the other consonants it has the sound of n; as, an-noi, an-raku, ban-dai.

The sounds of the other consonants, viz. b d h j k m n p s t w y z, do not differ from their common English sounds.

THE WRITTEN CHARACTER OR KANA.

The native language of the Japanese seems not to have been reduced to writing before the introduction of the Chinese characters. Ancient written

characters are spoken of, and their forms and sounds even given, but it is doubtful whether they were used. The only vestiges said to be still remaining are the inscriptions upon two stone tablets, preserved and regarded with superstitious veneration, one in a Sintoo temple in Miwa of the department of Yamato; the other in a temple in Kidzki in the department of Idzmo-

The most ancient writings in the native language still extant are the Kojiki (古事記), a history of Japan from the earliest ages to the time when it was written about A. D. 711; and the Manyōshu (萬葉集), a collection of native poetry made some fifty years later. In both of these works the square and unabbreviated form (Kaisho) of the Chinese characters is used phonetically to represent the sounds of the Japanese syllables. These characters were called Kari-na, (假字), or borrowed names, contracted afterwards into Kana (see 4 and 5 of the table). These characters, more or less abbreviated and simplified in form, are called Hira-kana (3 of the table), or plain letters, and are still the common symbols used in writing the native language.

The Katakana, (片假名), or side letters, (1 of the table) are also derived from the Chinese characters, where instead of taking the whole, only a part of the character is used. These are more ancient than the *Hirakana*, but have been little used except in Dictionaries, books intended for the learned, or to spell foreign names.

There is still another form used, called the *I*-ro-ha kana, said to have been invented by $K\bar{u}kai$, or $K\bar{o}b\bar{o}daishi$, a Buddhist priest and founder of the Shinyonshu sect, who died in A. D. 835. This form of Kana was devised by its author in order to assimilate the letters, as much as possible, to the Bonji, or characters used in the sacred books of the Buddhists.

The Japanese syllabary consists of seventy-two syllables, as seen in the table; they are generally arranged according to the five vowel sounds; as follows :----

ny kah sah tus nat han may yan ras way gan zan das ban pan in kit shiv chit ni hit mit i n riy i p gin jiy jit bit pit up kun szn tszy nus fur mun yun run u p gus dz dzy bur pus en ket set ter net hen men yen ren yer get zet der ben pen ot kon soy top nos hot mot yon ron wor gon zoy dor bot por

To complete this table the syllables, $1 \neq$ and \pm have to be repeated. There are also amongst them several syllables, as, \pm and \pm , 1 and \pm , 7 and \pm , 4 and \pm , and \neq and \neq , which are said to have represented different sounds in ancient times; but at the present time they can no longer be distinguished; in correct spelling, however, care must be taken that they be not written indiscriminately; there is a rule, established by ancient usage, to be observed in their use.

THE SYLLABLES IN COMBINATION.

The syllables commencing with the soft asperates, h and f, and y, for the most part, loose their consonants, and their vowels combine with the vowel of the preceeding syllable; sometimes forming a diphthong; as, a-hi, ai; afu, au,

or \bar{o} ; sometimes lengthening the sound of the first vowel; as, *nu-fu*, $n\bar{u}$; to-ho, $t\bar{o}$; *i*-hi, \bar{i} ; yo-fu, $y\bar{o}$; ho-ho, \bar{o} .

Sometimes with the consonant of the first and the vowel of the second forming a new syllable, epecially in writing the sounds of Chinese words; as, chiya, cha; shi-ya, sha; chi-yo, cho; shi-yo, sho; ji-yo, jo; or by still greater changes; as, chi-ya-u, chō; shi-ya-u, shō; shi-yo-u, shō; or by forming an entirely new sound; as t-eu, chō; he-u, hiyō; de-fu, jō; se-fu, shō.

In the following table all these changes are given in regular order, for the sake of those who may wish to consult this dictionary, and who may have the Kana only without the voice of the living teacher to direct them to the proper sound.

In the system of orthography adopted in this work, the y has been retained before the vowels a and o whenever possible, in order to separate the vowels, render the syllables more distinct, and follow the kana.

The syllables tsz, (γ) when preceeding the strong consonant, k, s, p, and t, is elided, and the consonant of the following syllable doubled; as batsz-kun becomes bakkun; matsz-szgu becomes masszgu; tetszpō, teppō; matsz-taku, mattaku.

Ku, (?) when following by a syllable beginning with k looses its vowel; as, baku-ka, bakka; biku-ko, bikko; koku-ka, kokka.

The sound of the vowel *i*, is often elided; as in *h'to*, *sh'chi*, *sh'ta*, *sh'te*, *ch'sha*.
